

SHREDDER MT

Shredder MT is an accessory e.g. for Wash Press TP.

SHREDDER MT

The shredder continually adapts the operating conditions to the wash press. It provides an optimally controlled retention time, which in turn provides maximum washing and dewatering.

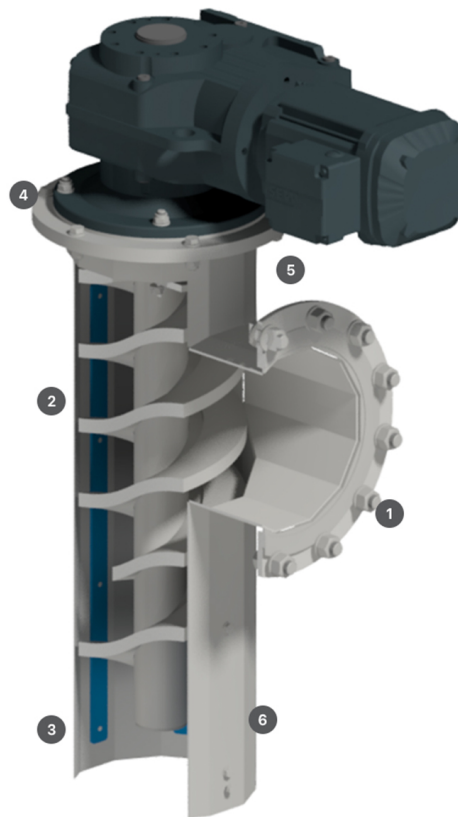

Shredder MT can be mounted horizontally, vertically or at an angle.

FUNCTIONS

- Pushing drive for higher capacity and more reliable operation.
- Mounting at the end of the pipe system provides more installation options.
- Shredding the screenings results in good aeration and a better working environment.
- Entirely enclosed, safe and hygienic.
- Increased dry substance content.
- Cleaner screenings.

SPECIFICATIONS

Diameter	<400
Capacity	<7 m ³ /h
Drive unit	SEW/Nord
Material	EN 1.4301, EN 1.4404

EXPLODED VIEW

1. Flanged inlet from wash press
2. Dual-pitch spiral for optimal shredding of screenings at the inlet
3. Hardox wear steel inserts for stabilization and linear support
4. Star coupling at drive shaft transmission
5. Ventilation connection
6. Fully enclosed design, optionally equipped with a hygienic bag cassette (Longopac)
